

PREVENTIVE MAINTENANCE CHECKLIST:

HOW TO EXTEND THE LIFECYCLE OF YOUR INDUSTRIAL GENERATOR

WEEKLY VISUAL INSPECTION

Check fluid levels, scan for fuel or oil leaks, and clear air intake vents to prevent engine overheating.

01

02

MONTHLY OPERATIONAL TEST

Run a 30-minute test, clean battery terminals, and inspect radiator hoses to ensure instant starting capability.

BI-ANNUAL FILTER & FLUID SERVICE

Replace engine oil, fuel filters, and air cleaners with genuine Rehlko parts to prevent internal component wear.

03

04

ANNUAL FULL LOAD BANK TESTING

Conduct a full load test to burn off carbon buildup, flush coolant, and verify ATS switching under actual grid failure.

GENUINE FACTORY SUPPORT

Protect your warranty and maximize equipment lifespan by insisting on authentic Rehlko components and certified technicians.
